NUMBER 1

C. S. Huang 1 Stress singularities at angular corners in first-order shear deformation plate theory

C. C. Hong and K. C. Jane 21 Shear deformation in thermal vibration analysis of laminated plates by the GDQ method

S. Srithongchai, M. Demircubuk and P. Dewhurst 37 A theoretical and experimental investigation of a family of minimum-weight simply-supported beams

B. W. Huang and H. K. Kung 57 Variations of instability in a rotating spindle system with various bearings

A. K. L. Srivastava, P. K. Datta and A. H. Sheikh 73 Buckling and vibration of stiffened plates subjected to partial edge loading

K. M. Liew and Y. Q. Huang 95 Bending and buckling of thick symmetric rectangular laminates using the moving least-squares differential quadrature method

J. E. Miller and S. Kyriakides 115 Three-dimensional effects of the bend–stretch forming of aluminum tubes

K. Komori 141 Effect of ductile fracture criteria on chevron crack formation and evolution in drawing

G. H. M. van der Heijden, S. Neukirch, V. G. A. Goss and J. M. T. Thompson 161 Instability and self-contact phenomena in the writhing of clamped rods

Calendar I

NUMBER 2

F. Tin-Loi and S. H. Xia 197 An iterative complementarity approach for elastoplastic analysis involving frictional contact

Y.-Q. Zhang, Y. Lu and M.-H. Yu 217 Investigation of strain localization in elastoplastic materials with transversely isotropic elasticity

W. M. Sebastian	235	Ductility requirements in connections of composite flexural structures
D. Mohr and T. Wierzbicki	253	Crushing of soft-core sandwich profiles: experiments and analysis
F. M. Andrade Pires, J. M. A. César de Sá, L. Costa Sousa and R. M. Natal Jorge	273	Numerical modelling of ductile plastic damage in bulk metal forming
A. M. Zenkour	295	An exact solution for the bending of thin rectangular plates with uniform, linear, and quadratic thickness variations
R. Kouitat-Njiwa and Jürgen von Stebut	317	Boundary element numerical analysis of elastic indentation of a sphere into a bi-layer material
N. Zabaras, S. Ganapathysubramanian and Q. Li	325	A continuum sensitivity method for the design of multi-stage metal forming processes
K. Woznica and J. R. Klepaczko	359	Modelling of inelastic bending of a metal sheet with thermal coupling
A. G. Atkins	373	Modelling metal cutting using modern ductile fracture mechanics: quantitative explanations for some longstanding problems
Calendar	I	

NUMBER 3

H. H. Ruan and T. X. Yu	397	Local deformation models in analyzing beam-on-beam collisions
T. Tarnai	425	Zero stiffness elastic structures
J. K. Paik, J. M. Lee and D. H. Lee	433	Ultimate strength of dented steel plates under axial compressive loads
M. Ciavarella and G. Macina	449	New results for the fretting-induced stress concentration on Hertzian and flat rounded contacts
A. N. Eraslan, E. Sener and H. Argeso	469	Stress distributions in energy generating two-layer tubes subjected to free and radially constrained boundary conditions
Y. Xiang	497	Vibration of circular Mindlin plates with concentric elastic ring supports
A. Chakraborty, S. Gopalakrishnan and J. N. Reddy	519	A new beam finite element for the analysis of functionally graded materials
C. Wensrich	541	Numerical modelling of quaking in tall silos
L. S. Bayoumi	553	Analysis of flow and stresses in a tube stretch-reducing hot rolling schedule

T. Y. Ng, H. Li and K. Y. Lam 567 Generalized differential quadrature for free vibration of rotating composite laminated conical shell with various boundary conditions

Calendar I

NUMBER 4

C. C. Cheng and J. Y. Wang 589 Free vibration analysis of a resilient impact damper

M. Nemat-Alla 605 Reproducing hoop stress–strain behavior for tubular material using lateral compression test

E. Pavlovskaia and M. Wiercigroch 623 Modelling of vibro-impact system driven by beat frequency

A. N. Eraslan 643 Elastic–plastic deformations of rotating variable thickness annular disks with free, pressurized and radially constrained boundary conditions

Q. S. Li 669 An exact approach for free vibration analysis of rectangular plates with line-concentrated mass and elastic line-support

Z. Xue and J. W. Hutchinson 687 Preliminary assessment of sandwich plates subject to blast loads

X. J. Xin, P. Jayaraman, G. S. Daehn and R. H. Wagoner 707 Investigation of yield surface of monolithic and composite powders by explicit finite element simulation

S. P. Harsha, K. Sandeep and R. Prakash 725 The effect of speed of balanced rotor on nonlinear vibrations associated with ball bearings

S. M. Lin, C. T. Wu and S. Y. Lee 741 Analysis of rotating nonuniform pretwisted beams with an elastically restrained root and a tip mass

C. Navarro, A. Mugadu, D. A. Hills and J. Dominguez 757 The influence of underlying tension on partial slip in complete and nearly complete contacts

Acknowledgement of Referees 775

Calendar I

NUMBER 5

G. Zhao, C. Cho and J.-D. Kim 777 Application of 3-D finite element method using Lagrangian formulation to dilution control in laser cladding process

D. Banabic, T. Kuwabara, T. Balan, D. S. Comsa and D. Julean 797 Non-quadratic yield criterion for orthotropic sheet metals under plane-stress conditions

Q. S. Li, L. F. Yang, Y. L. Zhao and G. Q. Li 813 Dynamic analysis of non-uniform beams and plates by finite elements with generalized degrees of freedom

W. Y. Lin and K. M. Hsiao	831	More general expression for the torsional warping of a thin-walled open-section beam
M. Zupan, C. Chen and N. A. Fleck	851	The plastic collapse and energy absorption capacity of egg-box panels
S. M. Hassan and M. Makary	873	Transverse vibrations of elliptical plate of linearly varying thickness with half of the boundary clamped and the rest simply supported
J. Hohe and W. Becker	891	Effective mechanical behavior of hyperelastic honeycombs and two-dimensional model foams at finite strain
J. L. Yang, X. H. Liu and S. R. Reid	915	Dynamic plastic behavior of a free–free beam striking the mid-span of a clamped beam with shear and membrane effects considered
K. M. Liew, S. Kitipornchai, A. Y. T. Leung and C. W. Lim	941	Analysis of the free vibration of rectangular plates with central cut-outs using the discrete Ritz method
Calendar	I
